Professional Summary

Versatile and detail-oriented Computer Science graduate with a strong foundation in software engineering, object-oriented design, and full-stack development using Java, React, and JavaScript. Skilled in building responsive web interfaces, scalable backend systems, and ensuring software quality through testing. Adept at problem-solving, quick to adapt, and committed to continuous learning through hands-on experience. Eager to contribute to dynamic teams and deliver clean, efficient, and impactful solutions.

Education

Bachelor of Science in Computer Science & Engineering *(*February 2020 – July 2025)

Shyamoli Textile Engineering College *(Affiliated with University of Dhaka)*

Cumulative GPA **3.42** out of **4.00 (***Till the 7th Semester***)**

Core Subjects: Object-Oriented Programming, Data Structures, Database Systems, Software Engineering, Web Development

Technical Skills

Computer Science & Development Skills

Programming Languages

- Java, C, Python, SQL

Frameworks and Libraries

- Java Swing, JDBC, Object-Oriented Design

Web Technologies

- React, HTML, CSS, JavaScript, WordPress & Elementor Pro

Databases

- MySQL, XAMPP

Software Development & Tools

- NetBeans, Android Studio, Visual Studio Code
- Git & GitHub

Development and Computational Environments

- Windows

- Jupyter Notebook, Google Colab

Problem Solving and Core CS Concepts

- Algorithm Design, Data Structures, Debugging

Other Tools and Skills

- Version Control (Git)

Search Engine Optimization

- Technical SEO | On-Page & Off-Page Optimization
- Keyword Research & Rich Snippets
- Tools: Google Analytics, Search Console, Yoast, SEMrush
- CMS: WordPress (content management and optimization)

Data Analytical skills

- Data Cleaning and Preprocessing
- Data Analysis & Exploration
- Data Visualization
- Statistical Analysis

Soft Skills

- Strong analytical thinking
- Excellent time management and prioritization
- Adaptability and teamwork
- Effective verbal and written communication
- Data-driven decision making

PROJECTS

- **Basic Console Game**
  Developed a simple console-based game using C programming language as part of 2nd-semester coursework, focusing on core programming logic and interactive gameplay.

- **Super Shop Management System**
  Built a super shop management system using Java in the 3rd semester. The project managed product inventory, billing operations, and employee details with a menu-driven interface.

- **Eye Cursor Control System**
  Created an eye-tracking cursor control application using Python in the 5th semester. Leveraged computer vision libraries to enable real-time cursor movement based on eye positioning.

- **Automated Teller Machine (ATM) Simulation**
  Designed and implemented an ATM simulation using Java during the 7th semester. The system included features like withdrawals, deposits, mini statements, and fund transfers in a secure environment.

- **Banking Management System**
  Developed a full-scale banking management system as a capstone project in the 8th semester, using Java for backend logic and JavaScript for front-end interactions. The system included account creation, transaction processing, user authentication, and balance management, offering a complete digital banking experience.

- **Web Application (React)**
  Built a responsive demo website using React, HTML, and CSS with a clean, modern design and smooth user experience. A showcase of best practices in front-end development and responsive design.

- **Brand Web Page (React)**
  Developed a simple, visually appealing brand website using React with a modern, responsive layout. Focused on clean UI/UX design and front-end performance optimization.

- **Foody Zone – Food Ordering Website (React + TypeScript + API Integration)**
  Created a food ordering web application using React, TypeScript, and backend API integration. Implemented dynamic menu browsing, order placement, and interactive UI, demonstrating skills in full-stack communication and scalable application design.

- **WordPress Website (WordPress – Elementor Pro)**
  Designed and customized a WordPress-based website using Elementor, moving from beginner to intermediate level. Applied theme customization, responsive design techniques, and integrated plugins to deliver a functional, client-ready web experience.

Work Experience

- **SEO & WordPress Intern**
  Asiana Times
  Sep 2022 – Oct 2022

Responsibilities:

- Managed and executed on-page SEO optimizations including meta tags, header structure, internal linking, and image alt attributes to improve organic search visibility.
- Optimized WordPress content layouts, ensuring SEO best practices were followed in article formatting and plugin configurations (e.g., Yoast SEO).
- Collaborated with the editorial team to conduct keyword research, map keywords to content ideas, and build an SEO-focused content calendar.

Outcomes:

- Contributed to a measurable increase in organic traffic during the internship period.
- Helped streamline the content publishing workflow with SEO-integrated templates and practices.
- Strengthened coordination between SEO and editorial teams, enabling more strategic content planning.

Certification

- **SEO Internship Certificate** – *Asiana Times, 2022*

Languages

- **Bangla** – Native
- **English** – Intermediate Fluency

Interests

- Desktop Application Development
- Emerging Web Technologies
- AI Tools and SEO Trends
